

#SayNoToSubCoSPV

No to yet another Board, new governance, Policy  
Committee, etc etc etc!

No to asset stripping of buildings and land

No to a 2 tier workforce

No to back door privatisation

Nobody voted to swap the National Health Service for  
'something else'. These changes are undemocratic.

Dear Chair and Board of Directors for Mid Yorkshire Hospitals  
NHS Trust

Please reconsider any ideas for setting up an Special Purpose  
Vehicle (SPV) subsidiary company, wholly owned by the Trust  
Board.

Follow the lead of Bristol Southmead Hospital and scrap the  
plans.

Do not confuse costs for funding. A new company would increase  
costs.

A new company will add a new layer of governance, a  
new management interface and increased operating costs.

If services can't work together now, it's only that they are  
poorly managed.

They already run departmental budgets.

We don't want staff to feel isolated, lose pay and conditions, or a  
2 tier workforce for the future.

It is an unacceptable if publicly owned buildings and estates  
are moved into a new company for nothing.

New evidence has emerged that management consultants make  
the NHS **less** efficient, not more\*. Say no to SPV.\*<https://doi.org/10.1136/bmj.k893>

Thank you.
